## DESCRIPTION

This project provides for the design and construction of stormwater management retrofit projects. The Department of Environmental Protection (DEP) conducts assessments of watershed management needs and related facility planning evaluations of retrofit project alternatives under Facility Planning: SM. Based upon results of these evaluations, specific retrofit projects are designed and constructed. Adding new stormwater controls in developed areas which lack such controls is required in the County's National Pollutant Discharge Elimination System (NPDES) Municipal Stormwater Discharge Permit. Where feasible, designs of retrofit projects include wetland features to add habitat and help address wetland goals of the Chesapeake Bay 2000 Agreement. In small drainage areas, retrofit projects may also include biofiltration, bioretention or stormwater filtering devices.

## JUSTIFICATION

This project will improve water quality and improve and protect habitat conditions in local streams. The project supports the goals of the Chesapeake Bay tributary strategy initiatives and the Anacostia Watershed Restoration Agreement; addresses County municipal National Pollutant Discharge Elimination System (NPDES) discharge permit requirements; and implements the County's adopted water quality goals (Chapter 19, Article IV).

Inventories of potential projects have been conducted under the Facility Planning: SM project in the Upper Paint Branch, Rock Creek, Cabin John Creek, Hawlings River and Northwest Branch watersheds. These studies have identified over 140 potential stormwater management retrofit projects for future design and construction. Watershed modeling studies to prioritize projects have been completed in Upper Paint Branch, Northwest Branch, and Rock Creek. The Countywide Stream Protection Strategy (CSPS) is used to target projects to priority subwatersheds determined based upon stream resource conditions and opportunities to improve or stabilize eroded or degraded stream habitat.

## OTHER

Department of Environmental Protection anticipates receiving approximately 50 percent State aid for projects included as part of this project.

Construction FY09 - Peachwood I, Olney Oaks, Germantown Estates and National Institutes of Health; Construction FY10 - Cold Spring, Fallsreach and Fallsberry.

## FISCAL NOTE

Starting in FY09 Water Quality Protection Charge is applied to this project to offset the decrease in Stormwater Waiver Fees.

## OTHER DISCLOSURES

- The Executive asserts that this project conforms to the requirements of relevant local plans, as required by the Maryland Economic Growth, Resource Protection and Planning Act.
- \* Expenditures will continue indefinitely.
